

## Treadmill Hydrotherapy

Hydrotherapy has long been recognized as beneficial for human conditioning and rehabilitation. The same benefits are available to dogs whether they are young, old, in competition, need rehabilitation or just need a relaxing form of exercise in an underwater treadmill system.

Benefits of Hydrotherapy for Dogs in an Underwater Treadmill:

-  Water buoyancy reduces gravity, diminishing concussive forces
-  Allows early intervention and quicker recovery times for animals
-  Water provides resistance throughout the range of motion, enable dogs with stiff joints to lengthen their stride and increase the benefits of exercise while minimizing pain.
-  Warm water assists in pain reduction and increases blood flow that aids in nerve and muscle growth.
-  Older animals can exercise effectively

## About Us

HydroHound LLC is a family owned and operated company based in Merrill Oregon, a beautiful area in the High Desert region of Southern Oregon.

We strive to offer superior products at a reasonable price enabling a broad range of consumers the ability to provide this effective rehabilitation and fitness tool to their cherished canine friends. Each HydroHound product is custom built and can be designed to meet your specifications and individual needs.

HydroHound strives to make our products work for you. We offer customization on each and everyone of our systems. Our products are not 'off the shelf' but built for your needs.

Lead designer Lyn Turner has been fabricating, installing, operating, and servicing aquatic horse treadmills for over ten years. Drawing from his expertise in the field of equine therapy, Lyn has combined this with his vast knowledge and experience to create the HydroHound Dog Treadmill Systems.

#### Water Storage Tank

- Tank Clean Out Port
- Drain Plug

#### Spa Reservoir/ Treadmill Housing

- Adjustable Water Jets (2 per side)
- Man walk along sidewalls
- Operator Platform for in tank assistance
- 2 clear panels
- 1 white panel
- Adjustable clear panel door

#### Treadmill

- Adjustable Belt
- Variable Speed (0-8mph)
- Stainless Steel Construction

#### Powder Coated Reinforced Frame

#### Equipment Housing

- Vented for air circulation to equipment
- Two sliding removable access doors

#### Loading Ramp

- Covered in ribbed rubber matting for maximum traction

#### Operator Walk Way

- Covered in ribbed rubber matting for maximum traction

#### Operator Control Pad

- Water Resistant
- Durable Steel Cased

Intended for facilities that have their own boiler or hot water access.

Components are the same as those in the **HydroHound I Treadmill System** less the following:

1. Water Storage Tank
2. Water Heater
3. Sand Filtration
4. Equipment housing is constructed of steel and is portable to accommodate placement preference.
5. Fill Pump

HydroHound's underwater treadmill systems allow you to adjust water depth to suit your needs, while the clear sides and doors allow you to monitor therapy and conditioning from the front, sides, and back. If preferred, the handler can stand inside of the tank on the man walk along the sidewalls or on the operator platform for in tank assistance.

Check out some of the many hydrotherapy benefits gained from using an underwater treadmill system for your dogs on our website [www.hydrohound.com](http://www.hydrohound.com).

## Purchaser Provided Materials

Flat floor surface to accommodate:

84" x 90" Footprint for HydroHound I

34" x 72" Footprint for HydroHound II

2" Drain for water evacuation

Power Source (GFCI Protected) 240V

60Amp for HydroHound I
